Recording of the Peer-to-Peer Exchange on Drought Management in Latin America and the Caribbean

|

Description / Abstract

English recording of the Peer-to-Peer Exchange on Drought Management in Latin America and the Caribbean held online on January 30, 2024. The event, co-organised by the United Nations Convention to Combat Desertification (UNCCD) and Global Water Partnership showcased various drought management initiatives across Latin America and the Caribbean. It brought together more than 200 experts, policy makers, and scientists who shared how droughts impact and manifest themselves in their respective countries and localities.
