# Dr Seth Vannareth: Key lessons and future steps for drought management and resilience in Cambodia

|

**Author(s)**

Uli Handayani, Global Water Partnership Southeast Asia

**Description / Abstract**

In this episode of the CLP Interview Series, Dr. Seth Vannareth, the permanent representative of Cambodia with WMO and adviser to the Ministry of Water Resources and Metrology Cambodia, discusses the country's drought challenges and how the CREWS program supports solutions like enhanced early warning systems and capacity building. She shares key lessons learned and outlines future steps to improve drought management and resilience in Cambodia.

□ About the CLP Interview Series: The CLP Interview Series features global experts and members of the UNCCD Communities of Learning and Practice (CLPs): <https://droughtclp.unccd.int/clp/home>. These experts share their perspectives and stories on drought management, offering a diversity of regional and sectoral insights. Each conversation highlights proactive initiatives and integrated approaches aimed at tackling drought challenges across the globe. Co-produced by United Nations Convention to Combat Desertification (UNCCD) and Global Water Partnership (GWP), the series serves as a gateway to exploring innovative ideas and inspiring transformative collective action.
