RESOURCE

Webinar 2 | Unveiling the World Drought Atlas: Risks, Pathways, and Regional Perspectives

|

Author(s)

Maurer, Tessa Tsegai, Daniel Otieno, Viola Marengo, José Acosta Navarro, Juan Desrainy, Louise

Description / Abstract

Drawing from recent drought events, experts from the Americas, Africa, and Asia will share how their regions have been affected, the preparedness and response mechanisms deployed, the importance of involving local perspectives in drought response and management, and key lessons for future resilience. This session will demonstrate how regionally tailored approaches are critical for managing drought but can also provide important insights for other places around the world.
